

MANUFACTURING/INDUSTRIAL EHS REGULATORY COMPLIANCE SERVICES

Gallagher Bassett Technical Services (GBTS) provides professional risk management services in the areas of environmental, health and safety, building sciences, forensic engineering, and construction.

We provide a wide range of environmental consulting, engineering, risk assessment, loss control, remediation management, regulatory compliance support, and emergency response management to the industrial, petro-chemical, transportation, agricultural, construction, and real estate industries. We also offer comprehensive industrial hygiene and worker health & safety training and OSHA compliance programs. We respond to a full array of emergencies and property losses, including fires, spills, explosions, and floods, as well as wind and weather-related events.

Our Regulatory Compliance Services range from performing specific projects to managing a company's compliance with applicable environmental and/or health and safety regulations. We tailor our regulatory compliance services to the specific needs of each client. GB Technical Services develops an individual scope service by listening to our client and applying data gathered during a plant wide compliance review. Our compliance professionals have a working knowledge of applicable federal, state and local environmental and health regulations considerable experience with compliance issues facing most industries; and open relationships with the regulating agencies.

Environmental Management Systems(EMS) and ISO 14001 are a continued focal point of for various industrial and manufacturing clients. Facility evaluation, task identification, task management, and ongoing system development are key components to a viable management system. An EMS includes permits, programs and plans required by the Clean Air Act Amendments (CAAA), Clean Water Act (CWA), Resource Conservation and Recovery Act (RCRA), Superfund Amendments and Reauthorization Act (SARA) Toxic Substances and Control Act (TSCA), local and state regulations and client-specific requirements.

WATER

- Pretreatment / Discharge Permits
- Spill Prevention Control and Countermeasures Plan
- SWP3 Permit, Plan

AIR

- Emissions Summary
- Air Permit Applications, Reporting & Annual Certification
- National Emission Standards for Hazardous Air Pollutants (NESHAP) Requirements
- New Source Review (NSR)
- Best Available Control Technology (BACT)
- Maximum Achievable Control Technology (MACT)

HAZARDOUS WASTE

- Generator Status
- LQG - Contingency Plan

SARA TITLE III

- Chemical Storage Summary
- Section 312 Reporting History (Tier II Report) and apparent applicability
- Section 313 Reporting History (Form R Report) and apparent applicability

OSHA PROGRAMS

- Asbestos Management
- Bloodborne Pathogens
- Confined Space
- Conveyance Systems
- Cranes Hoist Lifting Devices
- Electrical Safety
- Emergency Action and Fire Prevention
- Employee Egress
- Ergonomics
- Fall Protection
- Hand and Power Tools
- Hazard Communication
- Hazardous Waste Emergency Response
- Hearing Protection/Respiratory Protection
- Industrial Hygiene (Area & Personal) Monitoring/Indoor Air Quality
- Ionizing Radiation Safety
- Lockout/Tagout
- Machine Guarding
- Material Storage
- Powered Industrial Vehicles
- Process Safety Management
- Safety Training
- Walking/Working Surfaces
- Welding/Cutting Safety
